

Project Club, EEE organized a seminar on Image Sensors: An Overview

The Project Club has organized a seminar on Image Sensors: An Overview on 30th November 2016 with the support of the Department of Electrical & Electronic Engineering of UAP. The speaker, Dr. Khan Lutful Kabir explained different aspects of CCD and CMOS sensors from his 20 years practical experience.

The seminar was attended by faculty members and students from different semesters. The seminar constituted a good opportunity to understand the difference between CCD and CMOS sensors and the performance of CCD and CMOS sensors in different applications.

The seminar met its objective and the attendees enjoyed a very active and lively open discussion on the topic at the end of the seminar.
